

Evidence-Grade Entity Research — Lilambd Sample Project

Five public-interest technology entities. Official sources only. Operator identity, professional contact route, role boundary, confidence, and unresolved fields preserved.

5	10	5	0
ENTITIES	EVIDENCE RECORDS	BOUNDARIES RECORDED	PRIVATE EMAILS INFERRED

Executive result

All five bounded operator claims and all five professional contact routes were supported by official, public, first-party pages. Every record also retains an explicit role boundary so that “operator,” “host,” “maker,” “legal steward,” and “content owner” are not collapsed into one label.

What this sample proves

A research deliverable can be fast without becoming opaque. Each conclusion remains traceable to a source URL, a short excerpt, an observation date, a scoring rule, and a stated unknown.

Use boundary

This is an evidence-structuring sample—not legal due diligence. Facts and routes can change. Re-check sources immediately before outreach, contracting, publication, or rights-sensitive use. No private email inference or sensitive personal data was used.

Method: evidence before interpretation

STEP	ACTION	CONTROL
1	Define	Name the public project or service without presuming the legal entity behind it.
2	Verify	Find a first-party statement naming the operator, host, maker, or legal steward.
3	Route	Locate a published professional contact path and preserve its stated purpose.
4	Bound	Separate legal operator, infrastructure host, maintainers, communities, and content authors.
5	Score	Apply a visible weighted score; preserve unresolved fields instead of filling gaps.
6	Check	Run deterministic completeness and privacy checks before delivery.

Confidence scoring

40%	Direct official operator statement
25%	Official professional contact route
20%	Legal / operator specificity
15%	Ambiguity or role boundary recorded

Interpretation guardrail

“High confidence” means the bounded claim is strongly supported by official evidence. It does not mean absolute ownership, outreach authorization, commercial qualification, or legal clearance. The workbook exposes the inputs and formulas so a buyer can alter weights or audit each score.

Findings I: open knowledge infrastructure

OpenStreetMap		97% HIGH
Verified operator	OpenStreetMap Foundation (OSMF)	
Role boundary	Legal entity supporting the project; community mapping is not treated as Foundation-controlled.	
Professional route	legal-questions@osmfoundation.org · legal and licensing enquiries	
Unresolved field	No single owner of community-contributed map content.	
Evidence excerpt	"acts as a legal entity for the OpenStreetMap Project"	
Official sources	https://osmfoundation.org/wiki/About https://osmfoundation.org/wiki/Contact	

Wikipedia		100% HIGH
Verified operator	Wikimedia Foundation, Inc.	
Role boundary	Hosts and protects Wikipedia infrastructure; volunteers create and govern article content.	
Professional route	business@wikimedia.org · partnership enquiries	
Unresolved field	Infrastructure/legal operator verified; volunteer-authored content ownership not assigned.	
Evidence excerpt	"nonprofit responsible for hosting and protecting Wikipedia"	
Official sources	https://wikimediafoundation.org/who-we-are/ https://wikimediafoundation.org/contact/	

Python Package Index (PyPI)		97% HIGH
Verified operator	Python Software Foundation (PSF)	
Role boundary	PSF is the operating organization; Warehouse/PyPA maintains software and community processes.	
Professional route	psf@python.org · general PSF organizational route	
Unresolved field	No PyPI-specific operations email on selected pages; maintenance and legal stewardship differ.	
Evidence excerpt	"Python Software Foundation (PSF) who operates it"	
Official sources	https://blog.pypi.org/posts/2025-02-25-terms-of-service/ https://www.python.org/about/help/	

Findings II

Creative and browser infrastructure

Blender		100% HIGH
Verified operator	Stichting Blender Foundation	
Role boundary	Foundation facilitates blender.org; Blender Institute is separately described as the working company.	
Professional route	foundation@blender.org · organizational, branding, legal or press topics	
Unresolved field	Day-to-day Foundation/Institute operational split not fully mapped.	
Evidence excerpt	"independent public benefit organization"	
Official sources	https://www.blender.org/about/foundation/ https://www.blender.org/about/foundation/	

Firefox		100% HIGH
Verified operator	Mozilla Corporation	
Role boundary	Mozilla Corporation makes Firefox and is wholly owned by Mozilla Foundation.	
Professional route	Official Mozilla web route · Firefox partnership / distribution / licensing	
Unresolved field	No general direct business email on selected contact page.	
Evidence excerpt	"Firefox is made by Mozilla Corporation"	
Official sources	https://www.mozilla.org/en-US/firefox/faq/ https://www.mozilla.org/en-US/contact/	

Cross-case pattern

Public-facing project names often hide several distinct roles: legal steward, infrastructure host, software maintainer, contributor community, and content creator. The deliverable is valuable precisely because it does not force those roles into a single "owner" field. It preserves the operationally useful route while keeping the remaining ambiguity visible.

Quality assurance & delivery controls

Check	Result	Evidence
5 entities in scope	PASS	Five entity records; no substitutions.
10 first-party evidence rows	PASS	Two bounded claims per entity.
Professional route present	PASS	Five official routes with stated purpose.
Observed date present	PASS	All records: 2026-08-29.
Role boundary retained	PASS	One unresolved/boundary field per entity.
Private email inference	PASS	None. Only published organizational routes.
Sensitive personal data	PASS	None collected.
Secondary sources	PASS	None used.

Buyer-ready handoff

The companion XLSX is editable and audit-friendly: a cover/summary, row-level evidence register, transparent scoring model, and deterministic check sheet. The PDF is the concise decision narrative; the workbook is the review surface.

Known limitations

No corporate registry filings, paid databases, historical WHOIS, legal opinions, or direct confirmation from the organizations were used. Contact availability and organizational roles can change after the observation date. Revalidation is mandatory before real-world action.

Exact official-source registry

All pages were accessed read-only and observed on 2026-08-29. Short excerpts are used only to anchor the bounded claims.
